

Kai-lan 3-D Heart Template

To Make a Pop-Up Heart Card

- Glue the card's outside and inside templates back to back. Let dry.
- Fold the card vertically in the middle, and then unfold it.
- Print the heart shape on card stock and cut it out. Cut along the heart's dotted line.
- Apply glue to the back of only the central heart and the outermost ring. Attach where indicated on the inside of the card and let the glue dry.
- Place a thin, hard object, such as card stock, along the middle line of the card and fold the card with the card stock in between.
- Remove the card stock in between, open the card, and enjoy a pop-up heart from Kai-lan!

Card Outside
