

Kai-Lan's

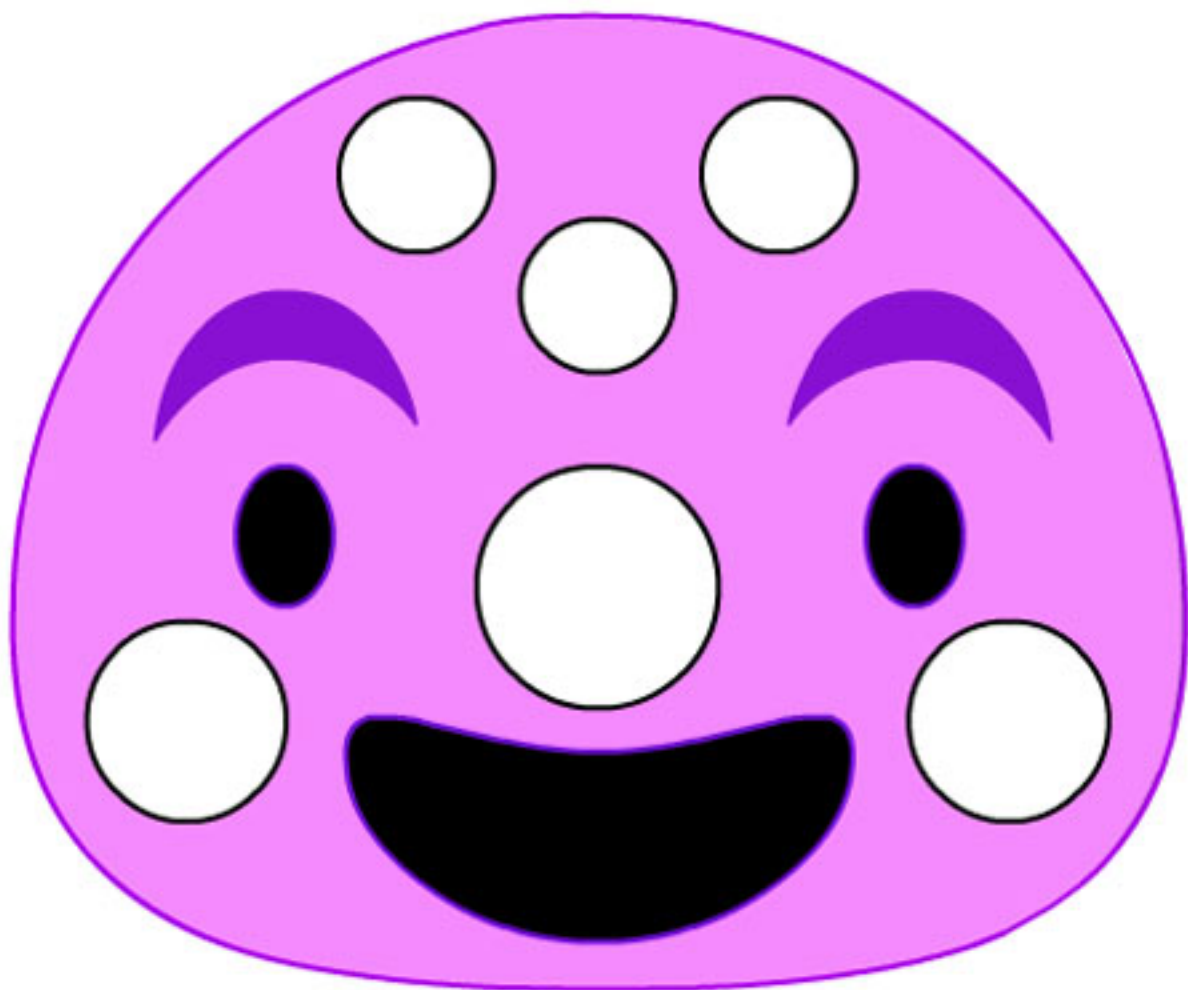

Great counting
adventure

Keep your eyes open, there's so much to see.
Circle each item, and count them with me!
5 watermelons, 4 masks, 3 plants, 2 lanterns, 1 panda

This mask needs some color, I think you'll agree.
So break out your crayons and color with me.
To pick the right color for each spot we see,
We'll follow the numbers 1, 2, and 3.

Color 1 spot blue ●

Color 2 spots red ● ●

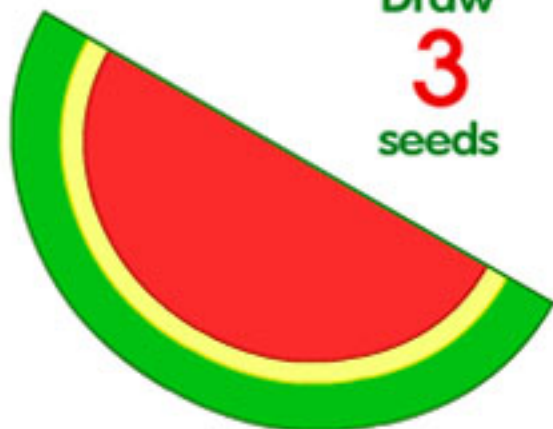

Color 3 spots green ● ● ●

YeYe is making our favorite treat!
We each know how many we're going to eat.
If you're good at counting, it sure would be great
To match up our numbers to the right dumpling plate.

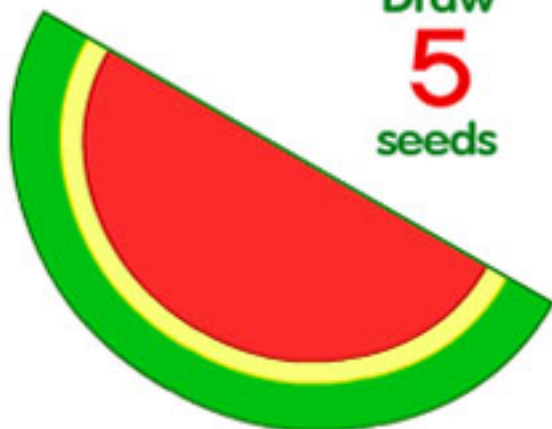

I'm painting a watermelon picture today,
and as you can tell, we're well on our way.
But something is missing. There's something it needs.
Will you help us add the right number of seeds?
